What's Inside

**Customized IT
Solutions**

**Document
Management**

**Production
Management**

**Task
Management**

**Purchase and
Inventory**

Who We Are

"We are a leading IT company specializing in customized software solutions designed to optimize and automate processes within the manufacturing and production industries. Our expert team develops tailored solutions that streamline operations, enhance productivity, and improve efficiency. In addition to our focus on manufacturing and production, we offer a wide range of customized IT services to address the unique needs of various industries. Whether it's process automation, task monitoring, or

data management, our solutions are built to help your business thrive in a competitive and dynamic environment."

Our Mission

"Our vision is to simplify IT services for individuals and businesses with little to no technical expertise, making technology accessible and easy to use for everyone."

"Our mission is to implement IT solutions seamlessly, ensuring a smooth transition and integration for businesses, with minimal disruption and maximum efficiency."

Our Solutions

Our Products

PMS

Monitor Processes!

"We have successfully implemented Production Management Systems across Mechanical, Electrical, and Electronics manufacturing industries. Our solutions provide multi-level PO tracking and process management, from the production manager to the shop floor, ensuring seamless oversight and control throughout the entire production process."

"Our Product Data Management (PDM) system ensures effective management of design documents by maintaining version control and task assignments. It streamlines product and part design management, offering efficient storage solutions on servers for easy access and organization."

PDM

Managing Designs!

Task

Track the work!

"Our Task Management System enables efficient timesheet tracking, customizable login approvals, task assignments, and comprehensive reporting. It optimizes workflow management, ensuring tasks are completed on time with clear accountability and oversight."

Inventory

"Our Inventory Management System is designed to streamline the tracking and management of inventory, ensuring accuracy and efficiency. Integrated with Bill of Materials (BOM) verification, it helps maintain alignment between inventory levels and production requirements. This system ensures that materials are tracked accurately, and BOM data is verified, reducing errors and improving overall production planning."

Customization Development Goals Update

"With over 10 years of experience working across various industries, we understand that a one-size-fits-all approach doesn't work for every organization. Each company has its own unique processes, challenges, and ways of working. That's why we remain committed to offering tailored solutions, customizing our existing products to better align with the specific requirements of each business."

Our Potential Clients–

"We have served over 15 clients, successfully implementing IT solutions across their diverse processes. Here are some of the key examples of our work."

Yashwant Engineering(Manufacturer)

Master Metrology(Manufacturer)

Ramelex Electricals, RTRI

Arya Electronics

Bhor Engineering and more...

"Our clients benefit from our services by boosting productivity and ensuring optimal utilization of resources."

Product Includes-

Multi login Web Portal

Mobile App for Floor

[Other-Dynamic Website](#)

Other Services

"At the same time, we are actively working with schools, colleges, hotels, and other retail service providers, offering them easy-to-implement and effective IT solutions that enhance their operations."

"We also provide social media marketing services across platforms like WhatsApp, Facebook, and Instagram. Additionally, we offer bulk messaging, email marketing, and voice call services to help businesses reach their audience more effectively."
